Recently, Equifax, one of the three national consumer credit reporting agencies, announced a major data breach. This breach affects approximately 143 million Americans. This is what we know according to Equifax: the data breach occurred May – July 2017, and the information stolen includes consumers' personally identifiable information, including names, Social Security numbers, dates of birth, addresses and, in some cases, driver's license numbers. Approximately 209,000 credit card numbers and dispute documents with personally identifiable information for approximately 182,000 consumers were also stolen. There is no evidence of unauthorized access to consumers' credit reporting databases.

To be clear, Welcome State Bank was not compromised and your information was not stolen from our bank.
